

Microsoft Exchange®

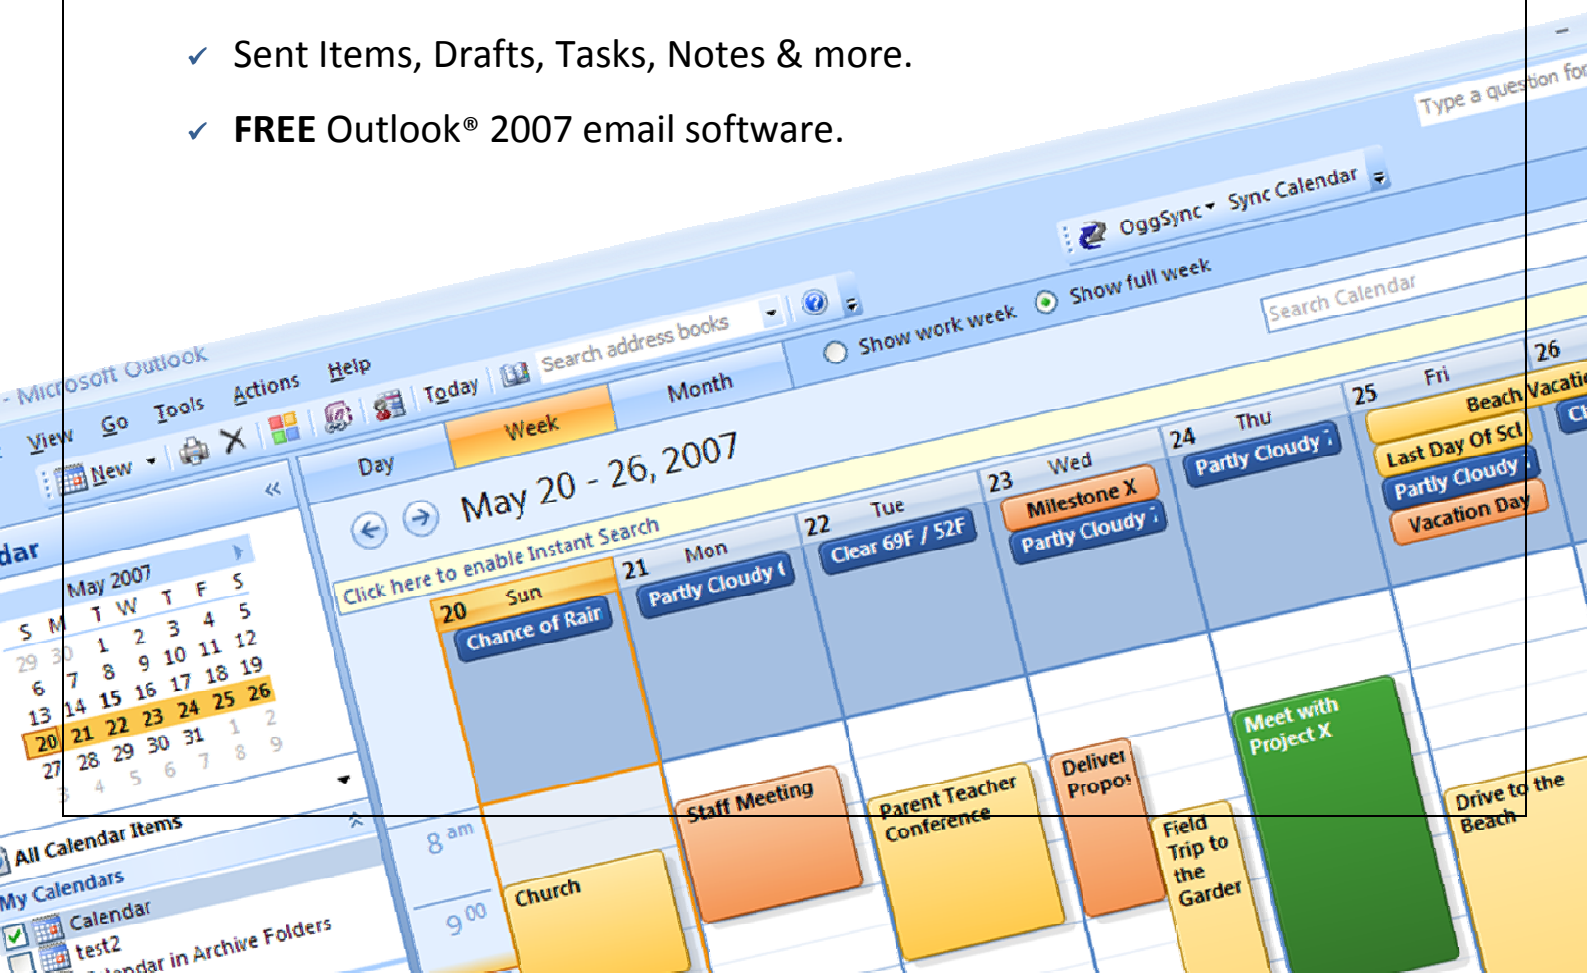

Business-class email and productivity tools

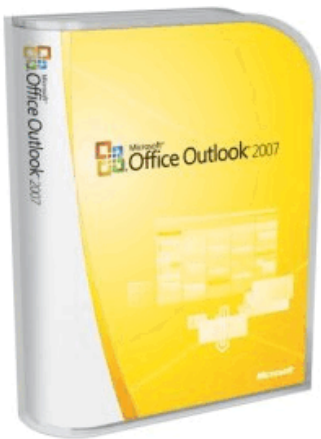

Deploy the full collaboration and email power of Microsoft Exchange without the outlay or administration of your own server: just purchase the mailboxes you need!

Microsoft Exchange mailboxes include:

- ✓ 2GB of mailbox storage space.
- ✓ Full Calendar & dynamically updated Contacts.
- ✓ Public Folders for easy online storage.
- ✓ Share documents with your colleagues.
- ✓ Advanced spam & virus protection.
- ✓ Sent Items, Drafts, Tasks, Notes & more.
- ✓ **FREE** Outlook® 2007 email software.

FREE Outlook 2007® software

Receive a FREE copy of Outlook 2007 to use with your Microsoft Exchange mailbox.

Make the most out of your Exchange mailbox. Send and receive email, manage appointments, tasks and contacts directly from your Windows computer.

Access from anywhere

With Microsoft Exchange as the mail server and Microsoft Outlook as your client, you can do more than send and receive email – you can share calendars, folders and contacts. Outlook is available for desktop, browser, and mobile access so you're always connected, whether you're in the office, traveling, or working at home. And since you always connect to the same Exchange server, your inbox stays synchronised, no matter which Outlook client you're using.

Mobile access

Use any iPhone or Microsoft Mobile device to access your Exchange mailbox.

- Emails are pushed directly to your mobile device, the moment they arrive in your mailbox.
- Data push occurs only when an event happens. No constant syncing needed.
- Access your email, calendar, contacts & tasks.

Outlook Web Access

Access your email from anywhere using Outlook Web Access, Microsoft's leading web mail solution. Outlook Web Access is included with all Microsoft Exchange mailboxes.

Fully hosted on our servers

There are **no technical skills required**: everything is hosted on our systems for complete reliability and performance. Because of this, Exchange is even suitable for small companies with only a few employees. You gain all the power with none of the pain when you choose our hosted Exchange solution.

You can use your own domain name (e.g. you@yourname.co.uk) and can even mix and match IMAP & POP3 mailboxes and Microsoft Exchange mailboxes on the same domain name!

Get started with Microsoft Exchange today and see the difference it will make to your productivity!
